

## Case Study

### De La Rue Smurfit, Bray – Roof Refurbishment

Before

After

#### Project Brief;

DLRS Group is a member of the Smurfit Kappa Group; with their security concept are the largest in Ireland. Established since 1976, the Company has production facilities in Bray, County Wicklow and Northern Ireland, servicing the needs of major financial and government bodies. The existing roof had been failing for a number of years with various patch repairs throughout. The Roof Centre Ltd along with Knapton Engineering produced an IKO Specification and specific weathering details to recover the roof whilst the facility remained fully operational. The 2,500 m<sup>2</sup> roof was complete within the restricted 12 week program. With a 20 year Warranty now in place DLRS employed Shamrock Asphalt to carry out regular maintenance ensuring the buildings continual performance.
